Identify the Assembly/Customer DWG to associate with Hardware Part

RO Asm/Cust DWG 01

The screenshot shows a software interface with a 'Folder Contents' table and a context menu. The table lists files with columns for 'Number' and 'Name'. The context menu is open over a drawing file, showing options like 'Open In', 'Add to Workspace', 'Check Out', 'Edit Attributes', 'Edit Associations', and 'New'. A red box highlights the 'Edit Attributes' option. A green line connects the 'Edit Attributes' option to the 'Visualization and Attributes' panel on the right, which displays metadata for the selected drawing.
